

PRODUCT BRIEFING FOR MARKETING

Nura AI

Your intelligent Muslim companion for Quran, tafsir, and dua — modern tools, grounded in classical scholarship.

nura-ai.app

Internal briefing · September 2026

What Nura AI is

Nura AI is a web app that helps Muslims **read** the Quran, **understand** it through classical tafsir and AI-assisted study, and **connect** with authentic duas for real life — including finding the right supplication based on how they feel.

It is not a chatbot with a Muslim skin. The Quran, tafsir, and dua library are the product. AI sits on top of those sources to make them easier to study and more personal to use.

In one sentence: Nura is a beautifully crafted Islamic study companion — a full Quran reader, classical tafsir you can ask questions about, and an authentic dua library with AI that helps you find and understand the right words.

What Nura is not

- Not a fatwa service, “AI imam,” or replacement for a scholar
- Not a memorization / hifz error-correction app
- Not a generic ChatGPT wrapper
- Not only a Quran recitation player

Two layers, one brand

Everything lives at **nura-ai.app**. There are two related products. A marketer should understand both, even if most public content is about the consumer app.

CONSUMER

Nura AI

For everyday Muslims: Quran reading, translations, audio, tafsir study, AI questions on a verse, duas, and emotional dua search. This is the public face of the brand.

EDUCATION

Nura Academy

For Quran teachers, tutors, weekend schools, and homeschool families: classes, assignments inside the Quran reader, student audio, a gradebook, parent visibility, and virtual lessons.

Who it is for

Audience	What they need	How Nura helps
Busy young Muslims	To actually understand what they recite, not just scroll Arabic	Word-by-word translation, audio, clean reader

Audience	What they need	How Nura helps
People in a feeling (anxious, grateful, lost, grieving)	The right dua, with a real source	Emotional Dua Search + authentic library
Students of knowledge	Classical tafsir without hunting through PDFs	Tafsir Explorer + ask-a-verse AI chat
Reverts and new Muslims	A gentle, complete starting point	Reader + translations + duas in one place
Quran teachers	A real classroom instead of WhatsApp	Nura Academy: assign, hear, grade, inform parents

Core features

1. Quran Reader

A full digital mushaf experience for all 114 surahs and 6,236 verses.

- Uthmani Arabic script, designed to look like a real Quran on screen
- Word-by-word translation — tap any Arabic word to see its meaning
- Multiple English (and other) translations
- Audio recitation from renowned qaris (for example Mishary Rashid Alafasy)
- Tajweed color-coding in light mode, with an on-screen legend (ghunnah, qalqalah, madd, and others)
- Mushaf page view (like a printed Quran) or translation / verse-list view
- Search by surah or verse content, bookmarks, reading history, light and dark themes

The reader is the visual heart of the product. Core reading is free.

2. Tafsir Explorer

Study classical commentary verse by verse — currently including works such as Tafsir Ibn Kathir — in a dedicated reader, not a dump of text.

- Browse editions and read alongside the Arabic and translation
- Highlights, notes, and bookmarks across tafsir
- Continue-reading so you pick up where you left off
- Share a verse as a branded image (Arabic, translation, optional tafsir excerpt)

3. AI Tafsir Chat (Premium)

On a given verse, the user can ask a question and receive an explanation grounded in classical tafsir — context, scholarly insight, how verses connect. It is a **study aid**, not a source of Islamic legal rulings.

Good examples of questions: “What is the context of this verse?” “What does Ibn Kathir say here?” “How does this ayah relate to the next?”

It should never be positioned as issuing fatwas, relationship advice, or medical/legal guidance.

4. Dua library

A curated collection of 100+ authentic duas with Arabic, translation, transliteration, and virtues, drawn from established sources (for example Sahih Bukhari where applicable). Built for daily use — morning, evening, protection, gratitude, and more.

5. Emotional Dua Search (Premium)

The user types how they feel — anxious, grateful, seeking guidance, heartbroken — and Nura matches authentic duas to that state. This is one of the most human, distinctive parts of the product: it starts from the person, then returns to the Sunnah, with the source on the card.

6. Dua Insights (Premium)

Deeper explanation of a chosen dua: meaning, related Quranic guidance, prophetic example, and how to live it — not just the text.

Nura Academy

A learning layer for Islamic education, especially Quran teachers who today run classes through WhatsApp, notebooks, or memory.

- Teacher dashboard: classes and 1-on-1 students
- Assignments tied to a surah/ayah range, completed inside the in-app Quran reader
- Students can submit recitation audio
- Gradebook with scores and a tajweed / fluency / accuracy rubric, plus written feedback
- Progress tracking and a parent view of the child's work
- Calendar and video calling for virtual lessons

Free vs Premium

Free	Premium — 7-day free trial, then \$5.99 / month
Complete Quran text	Everything in Free, plus:
Multiple translations	AI Tafsir Chat
Word-by-word translation	Emotional Dua Search
Multiple reciters	Dua Insights & analysis
Basic bookmarking	Full tafsir study experience
Dua library (core access)	

When talking about the product publicly: the Quran reader is free to use. AI-powered understanding and personalized dua tools are Premium. Do not advertise Premium features as if they were free.

Brand

Promise

Intelligence meets tradition. Modern technology in service of Quran, classical scholars, and authentic duas — a deeply personal Islamic learning experience.

Voice

Calm, intelligent, sincere. Slightly elevated, never preachy, never “hack your deen.” We say *deepen, understand, reflect, companion, classical, authentic, grounded*. We do not say *AI sheikh, unlock secret verses, guaranteed answers*.

Look

Navy, gold, and cream. Subtle Islamic geometry at low opacity. Large, careful Arabic typography. The app should feel like a quiet study space, not a neon tech startup.

How Nura is different

People already know Quran.com, Muslim Pro, Tarteel, and generic AI chat. Nura’s distinction:

- **Vs. most Quran apps:** we do not stop at reading. You can tap a word, hear a reciter, open classical tafsir, and ask a question on that verse.

- **Vs. hifz apps:** we are not primarily about catching memorization mistakes. We are study, reflection, and dua — plus a classroom for teachers.
- **Vs. ChatGPT:** the AI is attached to a verse and to tafsir, inside a product built for Muslims. It is not a blank chat box.

A useful way to hold it: **Read. Listen. Understand. Ask. Make dua.** For teachers: **Assign. Hear. Grade.**

Guardrails

These matter for any public explanation of Nura, including social content.

- AI is a study companion grounded in classical tafsir. Always say that. Never “AI scholar” or “replaces your sheikh.”
- Do not demo fiqh rulings, marriage advice, medical claims, or politics.
- When a dua is shown, keep the source visible. Do not imply a dua “cures” anxiety or illness.
- Quran recitation should be treated with respect — not under a beat, not as a joke, not stitched to comedy audio.
- Arabic should be taken from the app, not retyped from memory.
- Do not invent user numbers. “Thousands of Muslims” is the language already used on the site. Do not claim millions or scholarly endorsements you do not have.
- Do not dunk on other Muslim apps. Show Nura.

Facts at a glance

Name	Nura AI (Academy layer: Nura Academy)
URL	https://www.nura-ai.app
Platform	Web app — phone and desktop in the browser
Quran	114 surahs · 6,236 verses · Uthmani script · translations · audio · tajweed colors · mushaf view
